

DUX AUTHORISED SERVICE AGENT

Ecoworld are specialists in bio-remediation, the use of natural micro-organisms for the clean-up of LOW (Liquid Organic Waste). Our expertise in natural treatment processes resulted in our appointment as exclusive nationwide service agent and authorised distributor for Dux Grease Converter Systems.

DUX Grease Converters are part of the complete solution for environmentally friendly management of liquid waste in commercial kitchens. Using a natural bacterial solution, Grease Converters permanently break down fats, oils and greases to water-soluble, ecologically acceptable effluent levels. Dux recommends that a service agreement be entered into with Ecoworld to ensure optimum performance of these products.

ECOWORLD GREASE CONVERTER SERVICE

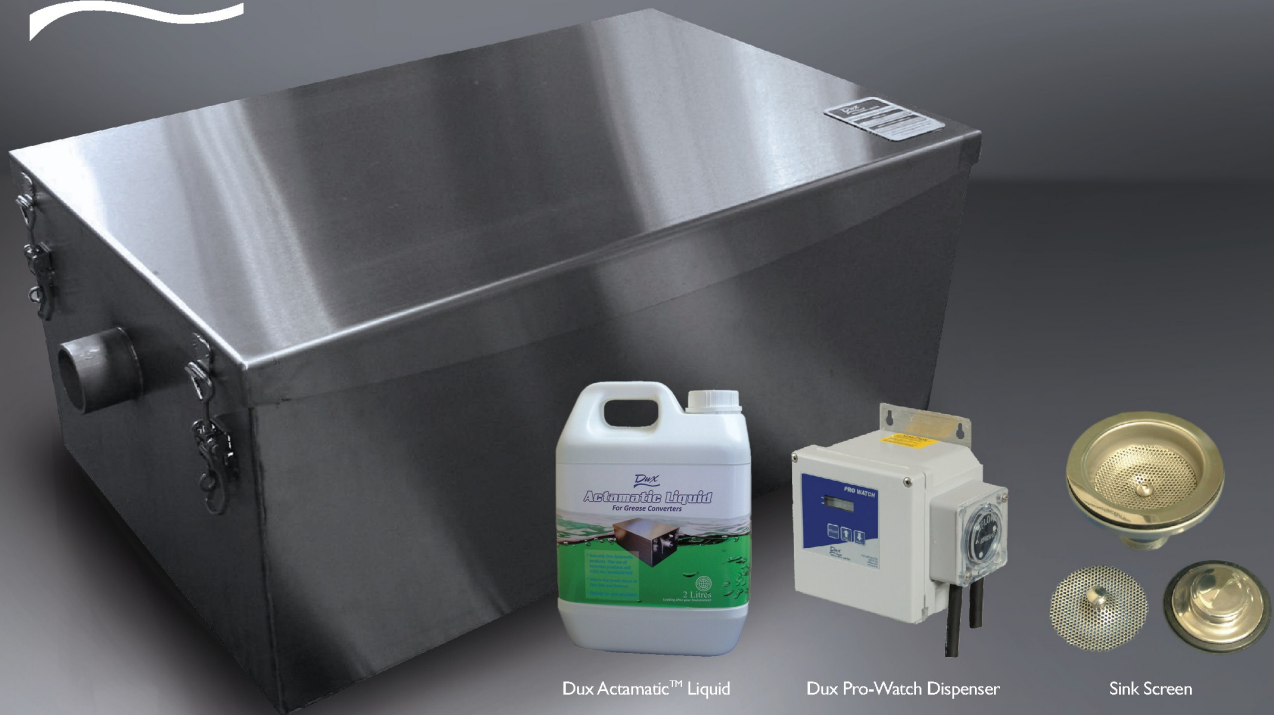

To prevent incorrect use and poor maintenance, a service agreement should be entered into with Ecoworld.

Ecoworld's network of fully trained and experienced team members follow the manufacturer's recommended protocols which ensure efficient and cost effective use of the Dux Grease Converter and compliant discharge levels.

Ecoworld's service contract includes:

- Correct installation and usage to ensure warranties.
- Commissioning.
- On-site system usage training.
- Product replacements.
- Correct dosing regimes.
- Dispenser checks and maintenance.
- Hardware condition.
- Internal loading and discharge.
- Pump out requirements.
- Six monthly Trade Waste Service inspection and reporting for council and client.

INDEPENDENTLY TESTED FOR EFFECTIVENESS

Dux Grease Converters have been extensively and independently tested to measure their performance.

Influents and effluent samples taken from a high turnover commercial kitchen with an Ecoworld Service Contract were analysed by an independent laboratory with the following results proving effluent leaving the GC has been substantially altered.

SAMPLE TYPE: AQUEOUS	INFLUENT	EFFLUENT	DECREASE
Total Suspended Solids (g/m ³)	34,000	390	99%
Oil and Grease (g/m ³)	25,000	270	99%

Note: Results from a range of samples taken over a period of 6 months

An Ecoworld Service Contract will ensure effective results
